

A-CLAD Coil Coating Service Offerings

Industry leading services to support the
aluminum composite panel (ACP) market

**More Colors.
More Choices.
More Service.**

AkzoNobel experts work closely with customers to meet the needs of their project.

Complexity of project requirements, color and appearance options all add up to difficult decisions. The AkzoNobel team is here to help smooth out the finer details of any project.

AkzoNobel A-CLAD coatings are supported by a team of experts who help make your business run better.

From scientists in our lab to account managers and field service representatives, we make coating hassle-free.

Key services:

- Field representatives with product expertise
- Quick lead time and make-to-ship custom orders
- Customer portal and product literature for quick access to critical information
- Quality SnapShot Program to optimize your business and project
- Color Assurance Program to match the entire building envelope

AkzoNobel

Color Matching Confidence

The color you spec is the color you get. Every time.

- ✓ Quick and accurate color matching and tracking
- ✓ Wide range of mica/metallic, gloss, print and texture finish options
- ✓ Easy color selection through digital tools (Canopy & website)

Quality SnapShot Program

Our Quality SnapShot Program proactively identifies trends and trouble spots to improve your business.

This customized program collects production samples to test in our lab and reports findings in order to optimize your overall production processes. Gathering and analyzing data, including CCH, salt spray, T-bends, MEK resistance, reverse impact, color (L.A.B.), gloss, DFT and others, improves performance for future batches and right first time color.

Color Assurance Program

Advantages of A-CLAD coatings don't just stop with aluminum composite panels. Our Color Assurance Program includes a unique set of defined procedures that our experts follow to match curtain wall extrusions with ACP material:

- ✓ Bringing coil and extrusion matches together for consistency among the entire building envelope
- ✓ Applying product specific color targets based on applicator line characteristics
- ✓ Helping you stand apart with a diverse set of service and product offerings
- ✓ Increasing customer satisfaction with targeted color matching, product codes and faster turnaround times

Service with Sustainability

AkzoNobel A-CLAD coatings help coil coaters be more productive, and specifiers to enjoy the benefits of a building that stays looking newer and cleaner for longer.

AkzoNobel coatings also help preserve natural resources. Each coating system is optimized for carbon footprint and helps reduce production inputs. In addition, AkzoNobel's COILTEC® CF65 primer is chrome-free and TRINAR® A-CLAD is PFOA-free. All coatings meet established legislation requirements.

At AkzoNobel, we embrace a culture of care for all materials we use, eliminate waste and reduce energy and water usage in everything we do.
