

CERAM-A-STAR® 1050 Select

Leading Coil Coating in a Standard Color Palette Program

Make color complexity a thing of the past

- Reduces complexity to increase operational efficiencies
- Improves availability resulting in quicker turns on projects

A standard color palette optimizes your business with many benefits. The AkzoNobel CERAM-A-STAR 1050 Select Standard Color Program helps coil coaters, service centers, distributors, OEMs and regional rollformers improve product availability, reduce inventory costs, turn projects quicker and drive concentrated color volume and consistency.

Benefits to Coil Coaters

For coil coaters, CERAM-A-STAR 1050 Select reduces overall complexity and drives volume of standard colors. Less color switch-out improves productivity through longer runs as customer orders are contained by standard color options. In addition, AkzoNobel optimizes processes through production and delivery and improves cost structure and planning. This all adds up to improved efficiencies and customer satisfaction.

Benefits to Service Centers & Distributors

For service centers and distributors of painted coil, CERAM-A-STAR 1050 Select structures your business to drive operational efficiency through reduction of color complexity. Our program drives volume of standard colors and lowers risk associated with stocking slow selling colors. In addition, we offer enhanced color service tools (including Canopy) to support and guide your customers to the standard color palette for structural efficiency.

Benefits to OEMs & Regional Rollformers

For OEMs and regional rollformers, CERAM-A-STAR 1050 Select takes the industry leading SMP product performance and combines it with improved availability of standard colors with immediate product availability. We combine that with enhanced color service tools (including Canopy) to improve customer satisfaction from the same leading product performance and warranty.

The AkzoNobel CERAM-A-STAR 1050 Select Standard Color Program is supported with new product codes from our leading SMP coating technology in the building and construction segment. Protecting your brand and reputation since 2005. Step up to the leading coating technology with a standard color palette program to optimize your business.
